Are you **passionate about programming** and want to contribute to solving a civic issue in your community?

Participate in **UniHack**, a **free** hackathon designed for high school and college students, focusing on solving civic problems. It will take place from **November 17th to November 19th** in Timișoara, România (**European Capital of Culture 2023**). You can form a team of 2-5 people and choose from **5** different **tracks** to code for. The best projects will **win prizes worth 5000 euros**.

In addition to the hackathon, you can also attend the **UniHack Conference** on Thursday, **November 16th**. This conference aims to explore how Artificial Intelligence influences key society domains, such as education, governance, and legislation, among others.

Sign up by following this link: https://unihack.eu/ and become a UniHacker. Registrations are open until 5th of November 2023.
We will ensure **free meals** and **accommodation** for every participant.

To find more about tracks, the venue, the official run of show and other details, follow the next link https://linktr.ee/unihack_ro.
